

TABLE S1
MEAN JEBSEN-TAYLOR HAND FUNCTION TEST COMPLETION TIME (IN SECONDS)
FOR EACH PATIENT (AVERAGED ACROSS THREE TRIALS).

Patients	atDCS		ctDCS		btDCS	
	Pre	Post	Pre	Post	Pre	Post
1	42.37	37.24	45.32	42.81	46.12	43.21
2	105.35	97.33	103.04	94.56	100.34	103.64
3	48.21	47.78	50.30	45.01	50.07	48.38
4	50.37	48.61	45.97	44.89	46.37	48.01
5	42.12	41.87	49.30	46.71	50.03	49.31
6	46.78	45.14	42.19	40.03	42.61	45.60
7	98.10	90.94	92.30	92.66	95.31	90.37
8	62.34	60.59	69.26	69.32	61.37	63.51
9	103.75	91.67	124.73	112.06	126.55	123.75
10	105.88	85.90	106.43	96.51	113.99	116.85
11	40.97	37.09	48.19	43.19	45.86	44.98
12	73.03	79.15	69.27	69.26	74.19	68.18
13	77.29	72.65	107.81	110.28	109.47	110.85
14	53.10	50.02	63.31	60.38	45.96	51.42
15	50.87	47.60	62.30	60.11	58.10	60.21
16	67.24	60.38	46.91	45.41	51.47	48.30
17	41.60	39.73	65.37	66.80	68.37	69.14
18	100.41	94.76	45.02	37.68	43.79	45.06
19	42.10	42.24	106.87	101.33	103.25	100.18
20	45.63	42.93	40.30	37.99	45.07	44.67
21	85.41	80.29	46.30	44.68	48.07	46.38
22	100.19	92.79	90.67	81.85	80.79	76.56
23	84.26	84.56	129.01	80.65	100.19	93.25
24	104.25	107.33	70.89	77.64	71.03	69.56
25	105.70	87.80	141.58	125.95	114.86	113.18
26	78.67	85.62	101.88	99.52	96.40	104.98
27	56.90	53.62	71.25	67.82	86.88	82.54
28	\	\	47.95	47.93	55.70	57.43

atDCS, anodal tDCS; ctDCS, cathodal tDCS; btDCS, bilateral tDCS.

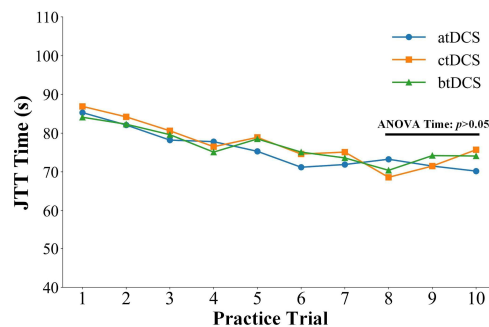

Fig. S1. JTT completion time across 10 practice trials. Two-way repeated-measures ANOVA on the last three JTT practice trials showed no significant main effects or interaction (Time: $p=0.812$; Montage: $p=0.793$; Time $\times$ Montage: $p=0.921$). JTT, Jebsen-Taylor Hand Function Test; atDCS, anodal tDCS; ctDCS, cathodal tDCS; btDCS, bilateral tDCS.

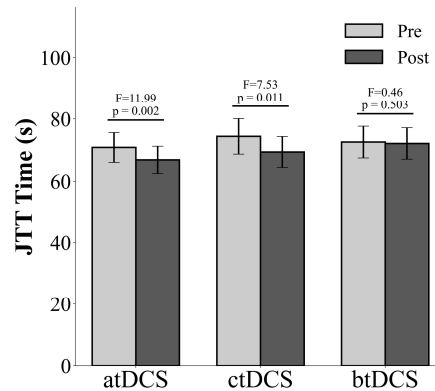

Fig. S2. Comparison of JTT completion times among the three tDCS montage groups at pre- and post-stimulation. In all three groups, post-stimulation completion times were lower than pre-stimulation values. JTT, Jebsen-Taylor Hand Function Test; atDCS, anodal tDCS; ctDCS, cathodal tDCS; btDCS, bilateral tDCS.
